

Interior Health

Program Director, Infection Prevention & Control *Southern Interior, British Columbia* *(Location Flexible)*

Love where you live, work and play. At Interior Health we strive to create an environment where you enjoy the work you do, the place where you work, and the people around you. Everyone has an important impact on the care continuum. We are looking for a leader who wants to make a difference and play an integral role in the contribution to wellness of all the communities and employees of Interior Health.

As the **Program Director, Infection Prevention and Control** you are responsible and accountable for directing Infection Prevention and Control (IPAC) operations throughout Interior Health (IH) in accordance with IH IPAC goals and directions. This position will also direct managers of discipline specific working groups to ensure high quality and standardized processes throughout IH related to infection prevention and control practices and surveillance. The Program Director will plan, coordinate, direct, evaluate and monitor IPAC operations and the strategic initiatives involved with infection prevention and control based on the clinical and operational needs across IH.

Qualifications

- Master's degree in business, health administration, or health-related discipline
- Minimum of ten (10) years' experience within senior healthcare administration with at least five (5) years in the management of a multisection or multi-site infection prevention and control service
- Completion of formal education in Infection Prevention and Control (e.g. IPAC Canada approved program)
- Certification in Infection Prevention and Control (CIC) preferred.
