

Gloves DON'T replace the need to clean hands

Quick Tips:

- Always clean your hands **BEFORE** putting on gloves and **AFTER** taking them off.
- Remember to use gloves:
 - For an aseptic procedure
 - When you may be exposed to blood/bodily fluids
- Always remove your gloves after you've finished the task!

For more information check out the Infection Prevention & Control website on the Inside Net or Interior Health website

You will touch someone's life today... Do it with clean hands
