

# 2023 - 2024 Webber Teleclass

## **January 26, 2023**

Personal protective equipment implementation in healthcare settings

Prof. Maria Clara Padoveze, University of São Paulo, Brazil

## **February 2, 2023**

Surfaces - a foundational issue in infection control

Linda Lybert, Healthcare Surfaces Institute

## **March 9, 2023**

Homecare & hospice - standardizing infection surveillance

Mohamed Adawee, Sparrow Health, Michigan

## **March 29, 2023**

The environment, the tick, and the pathogen - it's an ensemble

Jannelle Couret, University of Rhode Island

## **May 18, 2023**

Non-catheter-associated urinary tract infections

Cindy Hou, Jefferson Health, New Jersey

## **June 8, 2023**

Changing hand hygiene behaviour: nudging concepts

Dr. Marco Bo Hansen, Copenhagen University Hospital, Denmark

## **August 10, 2023**

The emergence of zoonoses: downstream impacts on human health and long-term care

Prof. Jason Stull, The Ohio State University

## **August 24, 2023**

Cost-effectiveness of strategies to control the spread of CPE in hospitals

Dr. Jean – Ralph Zahar, French-Muslim Hospital, Bobigny, France

**September 21, 2023**

Factors influencing opportunistic premise plumbing pathogens

Prof. Joseph O. Falkinham III, Virginia Tech University

**October 12, 2023**

Management practices to support infection prevention

Ann Scheck McAlearney, Ohio State University College of Medicine

**October 26, 2023**

Pulling the plug on the sink drain

Prof. Jean-Yves Maillard, Cardiff University

**November 16, 2023**

Quaternary ammonium-based disinfectants: advantages, disadvantages, and safety concerns

Dr. John M. Boyce, J.M. Boyce Consulting

**December 7, 2023**

Hospital wastewater systems: origins of novel nosocomial bacteria

Professor Colum Dunne, School of Medicine, University of Limerick, Ireland

**January 18, 2024**

Throw it away: how infection control practice destroys planetary health and fuels labour abuse

Prof. Mahmood Bhutta, University of Sussex

**February 8, 2024**

Targeted hygiene: a risk-based approach to applying policies and hygiene interventions in public settings and large events

Dr. Lisa Ackerley, International Scientific Forum on Home Hygiene

**February 29, 2024**

Infection prevention through the lens of implementation science

Dr. Mireille Dekke, Amsterdam Public Health Research Institute, Netherlands

**March 14, 2024**

COVID-19 Preparedness - what went wrong? What are the next steps? The point of view of a biomedical engineer

Dr. Davide Piaggio, University of Warwick, School of Engineering, UK

**April 2, 2024**

COVID-19's challenges to infection control dogma

Prof. Michael Klompas, Harvard University

**April 25, 2024**

Flexible endoscope reprocessing: focus on correcting key weaknesses

Prof. Michelle Alfa, AlfaMed Consulting, Canada

**May 23, 2024**

Infection prevention and control challenges and practical solutions in "other" congregate living settings

Barbara Shea, William Osler Health System, Canada

**June 20, 2024**

The effect of the climate on healthcare infection

Martin Kiernan, University of West London

**July 18, 2024**

CBIC and the future of IPC certification

Jessica Dangles, Certification Board for Infection Prevention and Control

**September 12, 2024**

Simple question, complex answer: determining the duration of contagiousness of individuals with COVID-19

Prof. Yves Longtin, McGill University, Montreal

**September 19, 2024**

The physics of flying feces

James Gauthier, Webber Training

**October 10, 2024**

Relationships among patient safety climate, standard precaution adherence, healthcare worker and patient outcomes

Prof. Amanda J. Hessels, Columbia University, School of Nursing

**October 17, 2024**

Longitudinal genomic surveillance to track pathways leading to clostridioides difficile colonization and infection in an ICU

Prof. Evan Snitkin, University of Michigan Medical School
